

SOC bands and conditional Z_2 screening: hydrogenated beryllenes

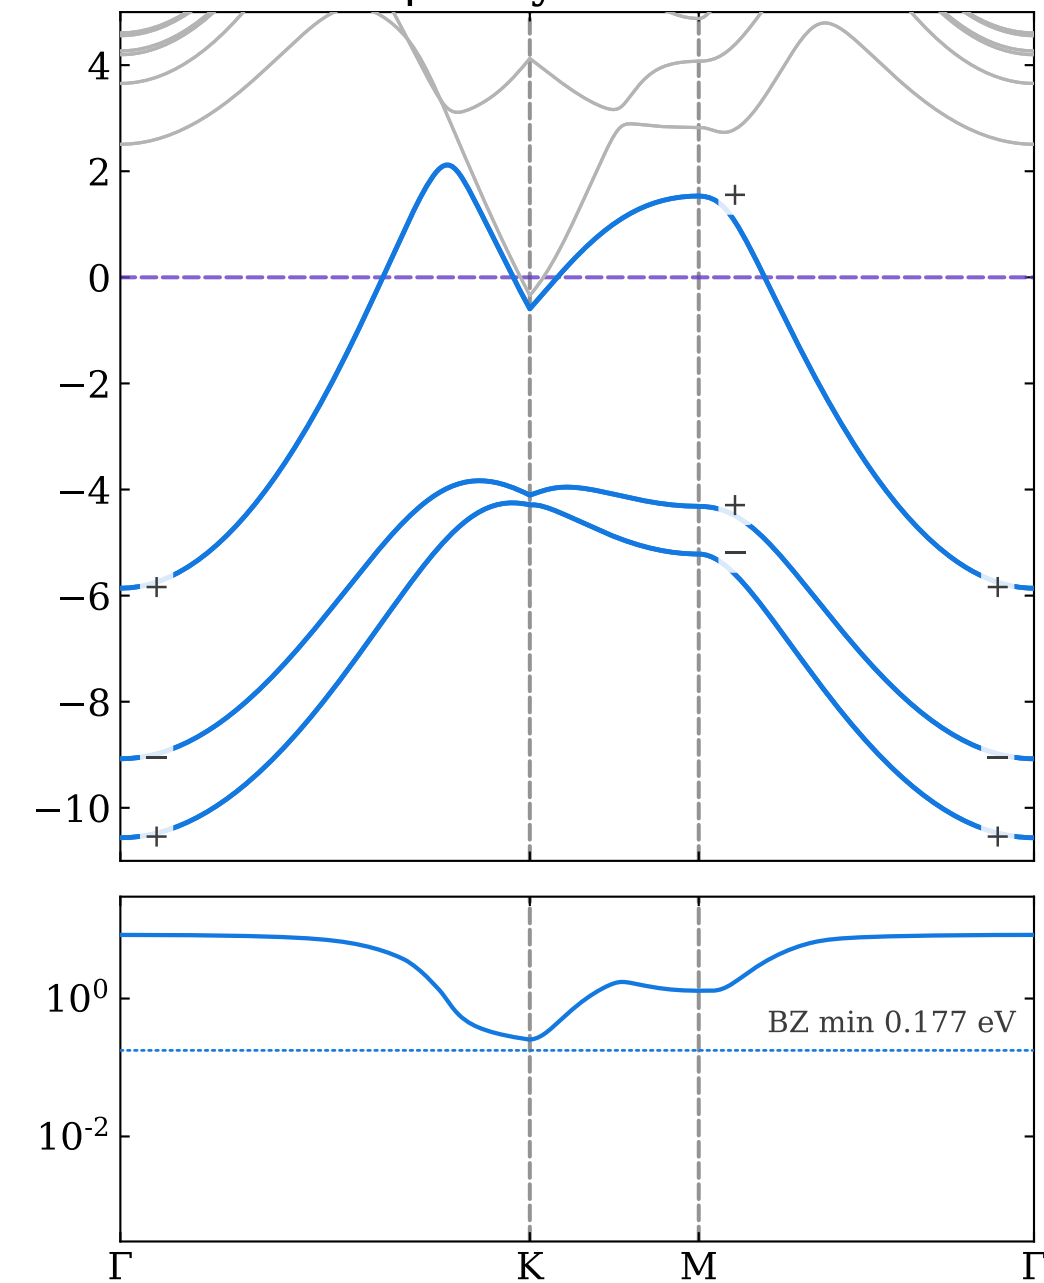

2H- α -beryllene: $\nu = 0$

1H- β -beryllene: $Z_2 = 0/0$ (WCC)

2H- β -beryllene: $\nu = 0$

— lowest-N subspace (bands 1...N) — 1H- β -beryllene bands 5-6 (lowest-6 subspace) — bands above N minimum of $E_{N+1} - E_N$ over the BZ - - - Fermi energy
